

## BITMAP MAGIC For Flexi 7.0 and PhotoPRINT 2.6 PART II

*So you want print and then Contour Cut a bitmap...  
But you don't want or need to use the PhotoShop behemoth?  
Here are a few bitmap magic tricks you can do quite simply:*

**Shape Contour Cut a Bitmap:** You have a great bitmap for printing, but you want to Contour Cut the shape of the image, not the ugly white "block" ...Let's use *C:\Programs\Flexi7\Samples\Lessons\Tiger.TIFF* as an example

- ⚡ Import or Acquire a bitmap – remember that the image quality and resolution matter...Garbage in = Garbage out.
- ⚡ Click to place the image where desired on the design

*Figure 1*

- ⚡ Select BITMAP ... BITMAP EDIT TOOL BAR
- ⚡ Click to choose the MAGIC WAND tool
- ⚡ Click on the unwanted area of "sky" (hold SHIFT to grab multiple unwanted areas)
- ⚡ Select EDIT ... SELECT ... INVERT SELECT to choose all of the area except the unwanted area(s)

*Figure 2*

- ⚡ Select BITMAP ... CONVERT MARQUEE TO SHAPE and a solid shape will appear on top of the desired area
- ⚡ Click to select the new shape only

*Figure 3*

- ⚡ Select ARRANGE ... CONTOUR CUT ... MAKE CONTOUR CUT

*Figure 4*

*Our sample Tiger will now have the thin gray Contour Cut line at it's edge !*
